Cocoanut Oil Fine For Washing Hair

If you want to keep your hair in good condition, be careful what you wash it with.

Most soaps and prepared shampoos contain too much alkall. This dries the scalp, makes the hair brittle, and is very harmful. Mulsified cocoanut oil shampoo (which is pure and entirely greaseless), is much better than anything else you can use for shampooling, as this can't possibly injure

pooins, as this can't possibly indicate the hair.

Simply put two or three teaspoonfuls of Muleified in, a cup or glass with a little warm water, then molsten the hair with water and rub it in. It will make an abundance of rich, creamy lather, and cleanse the hair and scalp thoroughly. The lather rinses out easily, and removes every particle of dust, dirt, dandruff and excess oil. The hair dries quickly and evenly, and it leaves it fine and silky, bright, fluffy and easy to manage.

You can get Muleified coccanut oil shampoo at any drug store. It is very cheap, and a few ounces is enough to last everyone in the family for months. Be sure your drugglet gives you Muleified.—Advertisement.
